PAKISTAN

Pakistan is the world's 6th most populous country with a vibrant fast growing economy that now boasts a GDP of over USD 300 Billion (40th largest in the world).

Pakistan is steeped in textile heritage, situated in the Indus river basin; well known as the birthplace of cotton. Being the world's 4th largest producer of cotton, Pakistan continues to play an important role in the global textile industry.

The textile industry in Pakistan is the largest sector of the economy, employing over 45% of the total labour force in the country as well as contributing 13% of GDP and 68% of exports. From cotton cultivation all the way up to finished production, Pakistan has world class infra-structure including state of the art factories, roads and ports to link our textile products to the world.

ABOUT US

Kohinoor Mills is one of Pakistan's largest vertically integrated textile operations with 2000 employees, USD 125 Million in annual sales and 70 years of heritage in textiles.

Spread on a 100-acre state of the art facility in Lahore, we deliver over 90 million metres of world-class fabric to leading brands, retailers and factories in over 20 countries around the globe. The company is involved in three major businesses; Dyeing & Finishing, Weaving and Energy.

SOME OF OUR LEADING CLIENTS

DYEING & FINISHING

Kohinoor Dyeing was set up in 2002 after a strategic decision by the company to move up the apparel value chain and compete with processing mills in Europe where manufacturing costs were becoming uncompetitive. After 22 years of operations KDM is now a market leader in cotton stretch and cotton blended fabrics for the fashion industry.

Through our R&D facility and partnerships with European mills we have developed innovative fabrics and hand-feel finishes which have enabled us to become key suppliers for leading global brands.

The division produces 4 million meters of dyed, PFD and print fabric every month using cutting edge machinery from Benninger in Switzerland, and Brugman in Holland.

WEAVING

Kohinoor Weaving is the flagship division of the company. Set up a small 48-loom project on a green field site in 1989, it has now grown into a state of the art facility with 272 high-speed air jet looms from Toyota in Japan, and Picanol in Belgium.

The division produces 4 million meter of grey fabric every month, which is partially consumed upstream by the Dyeing & Finishing division, while the rest is exported to clients in Europe and Asia. KWM has also diversified its operations into Jacquard fabrics for the local fashion industry and luxury clients in the US and Europe.

ENERGY

Pakistan is a developing country that faces energy shortages in peak months; this is very detrimental to industrial production. In 2003 Kohinoor Genertek was set up as an independent power plant to supply interrupted electricity and steam to the other divisions of the company.

The division has an installed electric capacity of 30 Mega-Watts and steam production of 20 TPH, which can be produced on a variety of fuel such as gas, oil, and biomass depending on seasonal availability.

GARMENT UNIT

Construction of the building is complete. Machinery selection and layout planning in process. Production to start from 3rd quarter of CY24. Intial capacity - 10,000 pcs/day.

SUSTAINABILITY & SOCIAL COMPLIANCE

Kohinoor is a socially and environmentally progressive company. We have obtained internationally recognized social compliance certifications to make our factories safe and healthy workplaces.

We also collaborate with brands and international organisations to continuously reduce our ecological footprint. Kohinoor closely monitors all emissions to comply with local regulations, we have also installed an effluent treatment plant to recycle and neutralize industrial fluids to prevent any damage to our environment.

CORPORATE RESPONSIBILITY

Investing back into the people and communities who have been the backbone of our success is a core part of who we are. Over the years we have donated to medical, educational and environmental project; both in our community and all over Pakistan.
