ABOUT US

Our history

Sinjo Textile is a fabric manufacturer based in China with more than 10 years' experience, known for its specialized functional fabrics.
Our diverse portfolio includes superior quality waterproof, windproof, quick-drying, membrane and technical fabrics, all custom-designed for the manufacture of sportswear and outdoor garments. We have our own knitting and dyeing factory and good relations with the woven fabric industry.
Our experience and expertise, as well as good relations with various clients, allow us to regularly export our products to different markets such as the US, South East Asia and the Middle East.

Main Products: Functional fabrics, activewear fabrics, sportswear fabrics, mesh, lining, etc

Where we are

Committed to excellence, we export our high-quality fabrics from China at competitive prices, ensuring that we meet our promised delivery times. In a strategic move to increase our global presence, Sinjo Textile has opened a branch in Portugal, complete with a showroom for an extensive collection of fabrics and a significant inventory. This facilitates rapid garment development, immediate support and fast delivery to our customer in Europe. To reinforce our commitment to quality and service, Sinjo Textile has invested in a state-of-the-art garment factory in Portugal, focusing on premium quality jackets and coats. This strategic facility allows for a seamless fusion of fabric production and garment manufacturing, guaranteeing the efficient and punctual delivery of high-quality finished products to our valued customers.

Our customer

More and more international clients and brands are relying on our fabrics and the service we provide to make their dream products. Working through partnerships with garment factories and buying houses you can find our high-quality fabrics and all the latest products.

Our mission

Continuous Innovation

We invest in research and development to be at the forefront of emerging trends and technologies in the textile sector.

Flexible Collaboration

We work closely with our clients to understand their specific needs and offer a tailor-made solution.

High Performance Fabrics

We develop advanced fabrics that offer comfort, durability and optimised performance for sports and outdoor activities.

Support Local

Being located in the main area of the textile industry in Portugal allows us to be close to our customers and offer a more complete and effective experience.

Our service

PRODUCTION – Customized solutions

Because each project and each client is different, we adapt our offer to their needs. Working in consolidation with the client to find the desired solutions and guarantee maximum satisfaction.

SAMPLE SUPPORT

We can provide our customer with samples according to their requirements to help them make the PP sample.

SALES

We follow up from the fabric sample and our strategic positioning in the market allows us to respond quickly and effectively to customers, both in small and large volumes.

QUILT
MESH/LINING

We look for innovative solutions in the development of our fabrics to deliver high quality products that respond to the needs and demands of the market. Our knit fabrics are known for offering great comfort and durability when practicing sporting activities.

By adding quick-drying properties, it will help wick moisture away from the skin and keep the body dry and cool in the most demanding and challenging moments, eliminating the moisture quickly and keeping the body dry.

Adding uv protection properties, with UPF 40+ and UPF 50+ ratings, will ensure greater safety when you're out in the sun, whether on the street or at the beach.

Whether it´s playing soccer, basketball, running, cycling or training, our fabrics will ensure great performance, maximum comfort and protection, especially during sports and outdoor activities.

Quilted fabrics are a versatile choice for urban clothing use. They combine comfort, style and protection from the cold and also can have unique sewing patterns that make them stand out from the crowd.

For sports, quilted fabrics are also excellent. You can use technical fabrics that offer breathability and thermal insulation as well, keeping garments light and still with free-moving.

For this fabrics you will find stitched patterns and ultrasonic patterns with a wide range of pattern designs that you can use.

One-Stop Solution

Aligned with the goal of serving the customer in the most complete way possible, Sinjo Textile has invested in a state-of-the-art clothing factory in Portugal, centered on the production of high-quality jackets and coats. This strategic positioning allows us to monitor every stage of product development and deliver personalized solutions tailored to the needs, desires and ideas of our valued customers.

Benefits

- **Agile Delivery:** With local production, jackets can be manufactured and delivered quickly, meeting customer needs efficiently.
- **Transparency and Traceability:** Total control of the supply chain makes it possible to trace every stage of the process, guaranteeing transparency and quality.
- **Personalisation:** Local production makes it easy to personalise jackets according to customer preferences.
- **Risk Reduction:** By avoiding dependence on external suppliers, you reduce the risks associated with delays or quality problems.
- **Social and Environmental Impact:** Local production contributes to the local economy and reduces the carbon footprint, making it a sustainable choice.
