SINCE 1982
COMPANY PROFILE

Goldentex: A Brief Insight

Founded in 1982, Goldentex has grown into a leading textile company with a workforce of over 1,000 employees and a production capacity of 3 million meters annually. The company prides itself on its fully integrated production process, encompassing dyeing, spinning, weaving, and finishing. Specializing in fabrics such as 100% wool, polywool, wool cotton, and wool linen, Goldentex is publicly traded on the Egyptian stock market. With a strong commitment to green and sustainable practices, the company continues to innovate while prioritizing environmental responsibility.

GoldenTex
SINCE 1982

Why Wool?

Wool has been a staple material in the fashion industry for centuries, and its popularity continues to grow. Whether you're a fashion enthusiast or a professional in the textile industry, understanding the advantages of wool fabric is crucial. So, let's dive in and explore why wool is the ideal choice for men's suiting.

GoldenTex
SINCE 1982

Why Wool?

Superior Comfort:
Wool is breathable and moisture-wicking, keeping wearers dry and comfortable in various climates.

Durability and Longevity:
Its elastic fibers resist stretching and wrinkling, ensuring that wool suits maintain their shape and appearance over time, making them a worthwhile investment.

Versatility and Style:
Available in various weights, textures, and patterns, wool accommodates diverse style preferences for men's suits.

Insulation and Temperature Regulation:
Wool provides warmth in cold weather while regulating body temperature by absorbing and releasing moisture, ensuring comfort in both warm and cool conditions.

Odor Resistance and Easy Maintenance:
Wool's natural properties resist odors and require less frequent washing, with simple care like brushing and airing out keeping suits fresh.

Eco-Friendliness:
Wool is a renewable resource, and often produced with sustainable practices, making it an environmentally friendly choice for fashion.

GoldenTex
SINCE 1982

Integration Process

Design:
Egyptian and Italian designers carrying out distinguish two collection per year.

Dyeing:
With annual capacity of 1200 ton annually Goldentex process Tops, Fabric and yarn Dye using the latest technology.

Spinning:
14,200 spindles creating average of 1000 ton annually to convert raw material of tops to yarns ready for weaving .

Weaving:
A total machinery of 75 loom producing 3.5 million meter annually with capability to produce a wide range of weaving structure .

Finishing:
State of art technology finishing line with capacity up to 5 million meter annually.

QC:
Between trained inspector, technology and compliance to international standard, Goldentex applies 4 and 10 points check.

GoldenTex
SINCE 1982

Dyeing Process

With annual capacity of 1200 ton annually Goldentex process Tops, Fabric and yarn Dye using the latest technology. Capacity for Dyeing Machines is from 3 kg (sampling) to 420 kg (bulk).

GoldenTex
SINCE 1982

Spinning Process

14,200 spindles creating average of 1000 ton annually to convert raw material of tops to yarns ready for weaving. Ability for producing different types of yarn types and count.

Starting Blending tops fibers, moving across yarn preparation process to Spinning frames, Winding and cleaning then Folding and Twisting if required.

GoldenTex
SINCE 1982

Weaving Process

Starting Warping ability with a total machinery of 75 loom producing 3.5 million meter annually with capability to produce a wide range of weaving structure.

GoldenTex
SINCE 1982

Finishing Process

State of art technology finishing line with capacity up to 5 million meter annually.

Factory equipped with latest technologies on finishing fabrics reaching the high quality requirements.

GoldenTex
SINCE 1982

Collection Content

Worsted Pure New Wool and Wool blended with Noble like Cashmere and Silk also natural fibers like Cotton and Linen, also artifactual fibers like Polyester, Polyamide and Cordura.

Generating the latest Designs, Colors and Fashion trends to fulfil our international customers needs.

Using Wool Microns starting from 16.5 until 25 all worsted pure wool from New Zealand and Australia.

Natural Fibers and Artifactual Fibers used from European suppliers.

Utilizing our state of art machinery and lates technologies to produce Eye Captured products.

From Tops to Finished Fabrics Goldentex Process for Mix and Match Visually and by Datacolor readings.

Sustainability and CSR

Sustainability and CSR

At Goldentex Wool Co., we are conscious of the impact our organization has on the economy, environment, and the society. Hence, our Sustainability Policy and CSR program ensure we cover the main and vital aspects of sustainability, and social responsibility; ensuring a healthier and brighter future for ourselves and upcoming generations.

When it comes to the environment, we abide by our sustainability program, which involves recycling the water used, ensuring our yarn suppliers abide by certain environmental standards
We are committed to improve the well-being, living standards, knowledge, and skills of the communities in which it operates. We therefore have several projects dedicated solely to philanthropic activities such as: Arafa Charity organization, Yehia Arafa Children charity Hospital, Housing Facilities for Workers and Children Day Care for working mothers.

Additionally, we always ensure we have no less than 5% of our employees with disabilities, we prefer to see them as unique employees whom are differently-abled rather than dis-abled, and believe in their talents and capabilities.

Sustainability and CSR

Based on the company's awareness of the importance of Water treatment as its plays a crucial role in protecting the environment and preserving natural ecosystems. We have our Station of Wastewater treatment processes that ensures to remove pollutants and harmful substances from wastewater before it is released back into Sanitation pipes. Which is crucial for protecting water quality, ecosystems, and ensuring long-term access to clean water.
