Who we are

March 27, 2025

Controlnet is a well-established company at the heart of the Prato textile district, with over 190 professionals working daily to ensure the absolute quality of fabrics. Founded in 1978, we were born with the aim of innovating quality control in the textile sector, collaborating from the very beginning with Prato's finishing companies to ensure that dyed and finished fabrics met the highest quality standards. Our passion for innovation and attention to detail have allowed us to grow, becoming a key partner for global companies.

What We Offer

We provide a comprehensive range of specialized services aimed at ensuring that every stage of textile processing achieves perfection:

- **Raw fabric inspection:** We perform in-depth checks from the early production stages, identifying and correcting defects before they become problematic.
- **Mending and repair services:** Our expert artisans carry out delicate repair work, removing defects without compromising the quality of the final product.
- **Fabric finishing:** Using advanced technologies, we treat fabrics to enhance their quality, making them market-ready and perfect in every detail.
- **Finished product control:** We rigorously inspect every product to ensure it meets quality standards, regulatory requirements, and consumer expectations.

- **Highly qualified personnel:** Our team of specialists oversees the entire finishing process and supports companies in developing their sample collections.

Why Choose Controlnet

Choosing Controlnet means relying on a partner with a long history of success and a solid reputation for reliability and excellence:

- **45 years of experience:** Our many years of expertise have allowed us to acquire in-depth knowledge of dyeing and finishing processes, making us the preferred partner for those seeking perfection.
- **Cutting-edge technology:** We use modern machinery certified under ISO 9001, along with international recognitions such as the Global Recycled Standard (GRS) and GOTS, ensuring not only quality but also sustainability.
- **Real-time monitoring:** Thanks to our IT platform, clients can track every stage of production and access documents in real time with private, personalized credentials.
- **Flexibility and responsiveness:** Our network of five companies enables us to respond quickly and precisely to each client's needs, even for the most urgent or specific requests.
- **Certified quality:** Our processes are validated by TÜV Italia Srl through Accredia, ensuring that every step of our work meets the highest international standards.

Certifications and Accreditations

Controlnet is proud to hold the highest international certifications, demonstrating our commitment to quality, sustainability, and safety:

- **ISO 9001:** Quality management system certification ensuring optimized and reliable processes.
- **Global Recycled Standard (GRS):** The purchase of Global Recycled Standard certified products demonstrates demand for recycled content and best processing practices in the supply chain.
- **Global Organic Textile Standard (GOTS):** Certification recognizing our responsible management of organic fabrics.

- **ISO 45001:** Certification for occupational health and safety management, protecting our employees.
- **RWS:** Certification that verifies wool fiber animal welfare and land management requirements and tracks it from farm to final product.

Controltex srl is GRS certified by ICEA

Certified by ICEA
License Number GOTS-19283

Controltex srl 02200610976 company with a quality management system certified according to the ISO 9001 standard.

Details

Controlnet is strongly committed to sustainability, integrating eco-friendly practices at every stage of our production process. Through a circular economy approach, we recover discarded fabrics and transform them into new resources.

Our quality control process is meticulous and structured to ensure that every fabric achieves perfection at every stage:

- **Fabric collection and digital data acquisition:** Each order is digitally managed to ensure traceability and precision.

- **In-depth pre-inspection:** Checking color, selvage, weight, shrinkage tests, and other physical fabric properties.
- **Visual inspection and defect mapping:** A thorough visual examination to identify defects, with timely communication to suppliers and clients.
- **Result tracking:** Documentation for each inspection is available in real time, with detailed reports including photos, packing lists, invoices, and more.

We use state-of-the-art tools such as Tecnoteam (2024) and CTM (2024) spectroscopes, equipped with electronic dancers and electronic bars for precise fabric measurement, as well as metal detectors for the most demanding markets.

At **ControlNet**, we ensure maximum confidentiality in the research, sample development, and production phases.

- **Confidentiality:** All information related to projects and samples is treated confidentially and not shared without the client's consent.
- **Protection:** Information is accessible only to authorized personnel, with appropriate security measures in place.
- **Exclusive use:** Data is used solely for agreed-upon activities, with no additional purposes.
- **Ownership:** Any information provided by the client remains their exclusive property.

We are committed to safeguarding every aspect of each project, maintaining a relationship of trust and transparency.

ControlNet is the key to achieving impeccable quality products that comply with international standards, through an approach that integrates technology, expertise, and environmental responsibility. We are ready to meet every need with innovative and customized solutions, always staying ahead of industry trends.
