COMPANY PROFILE

One-Stop Textile Solution For Everything

Located in the heart of the industrial zone of Karachi, Orient Textile Mills Ltd. provides superior quality textiles to a wide range of customers around the globe in addition to catering to the domestic market. Orient Textiles brings an innovative approach to the world of textiles. Our aim is to exceed the expectations of every client by offering outstanding customer service, increased flexibility and greater value. Our associates are distinguished by their functional and technical expertise combined with their hands on experience, thereby ensuring that our clients receive the most effective and professional service they deserve.

Orient Textiles is always ready to cater to the needs of the textile world with strong support from our manufacturing base and the state of the art weaving setup. Equipped with Air Jet Picanol Looms, Orient Textiles has the capability to produce Yam Dyed, Jacquards, Dobbies, Percales, Sateens, Twills, and a variety of Herring bones. Both for prints and solids programs. With a monthly capacity of 3 million meters and thread counts ranging from 144 to 1400, any production challenges can be undertaken.

With a firm belief that the textile sector will have rapid growth in this part of the world and also the support shown by our customers, a major expansion was done 10 years ago in the name of Ebrahim Textile Mills Ltd. Ebrahim Textile started, operations in January 2012 and is the most modem facility in Pakistan with a state of the art Wet Processing facility possessing a capacity of producing 5 million meters per month and a Stitching facility with a capacity of handling 2.5 million pieces per month.

At Orient Textiles we understand that the farther away the consumer is from the manufacturer, the more important it is for them to know what are the current market trends. In order to cater to the requirements of the consumer, we have qualified staff at Orient Textiles who have the task of devising the next generation of ideas which will appear later in our collections as different products. We do our best to ensure that the latest technology, marketing, customer servicing, manufacturing resources and forward thinking are incorporated into our products. Keeping this in view, design houses are already in place both in Europe and in Pakistan with teams which are fully aware of both the European and US market requirements.

With this, we at Orient Textiles believe to have the potential to forge Personal Strategic Business Partnerships with all global organizations from the Textile industry and be their One Stop Solution.

WELCOME TO THE WORLD OF ORIENT

Orient Textile Mills Pvt. Ltd, located in the heart of Karachi's industrial zone, delivers excellent quality textiles to a wide range of clients around the globe, in addition to catering to the local market. Orient textiles, being a creative contributor to the export market, brings an innovative approach to the world of textiles, providing all solutions within a single system and acting as a liaison between the end user and cotton producer.

VISION

Our vision is to be known as a quality-focused, compelling, and versatile manufacturer for sourcing textile products and fabric worldwide. We are committed towards the textile industry and have our focus on people, technology and environment.

MISSION

Our mission is to exceed every client's expectations by providing exceptional customer service, ensuring customer satisfaction, and increasing flexibility and value by deploying diverse human talent, technology, automation, and a wide variety of materials, thereby optimising system functionality and improving operation efficiency.

VALUES

We believe in good business practices that include corporate governance, following government laws and regulations, serving stakeholders, welfare of the employees and a good healthy environment.

ORIENT TEXTILE MILLS

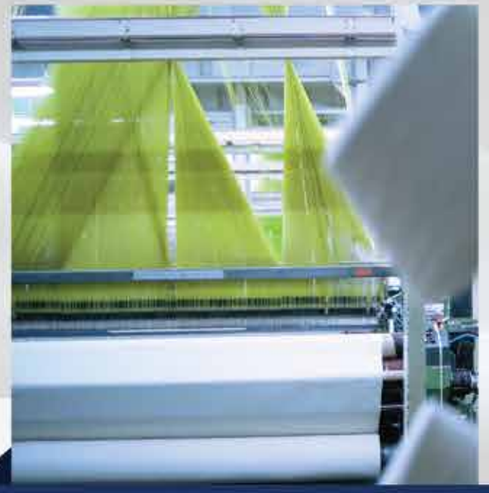

A 20-Year Story Of Par Excellence And Premium Quality

THE BEGINING

Orient Textile Mills Pvt. Ltd, established in 2001. Moving gradually and making the basis strong, the company finally decided to enter in to the international arena. Orient Textiles is involved in every stage from cotton selection to final packed goods. With a stable financial position the company is ready to cater the needs of the textile world.

The company brings an innovative approach to the world of textiles, provides all-solutions for everything textile within a single system and acts as a liaison between the end user and cotton grower.

Quality, service, innovation and cost effectiveness are areas in which we excel. We are committed towards the textile industry and have our focus on people, technology and environment.

ECO-CONSCIOUS

We Make It A Priority To Prevent The Environment From Hazardous Alkaline Discharge In The Main Drain. And For A Sustainable Future, We Have Installed Waste Water Treatment And Caustic Recovery Plant For Minimum Wastage.

With a strong manufacturing base and state-of-the-art weaving setup we are capable of producing jacquards in T-180s to T-600 and dobby up to a 1400 thread count. We also possess the excellence to produce sateen, percales, jacquards and yarn dyed fabrics in both solids and prints.

We ensure the latest technology, marketing initiatives, Product Development, customer servicing and manufacturing resources are all part of our final products.

Our Certifications And Achievements

Conservation Projects

Water

Last year, OTM saved 928459 Gallons of water, which amounts to a Saving of 1.5 Million Glasses of Water.
Installed Effluent treatment plant designed of capacity 500,000 gallons per day but we have achieved 300,000 gallons per day which is around 60% of available capacity to secure environment.

Energy

Installed 2.2 MW Gas Generators.
Installed 923 KWhr Waste heat recovery Boiler.
Installed 250 KW Solar Power System.
Total annual Gas savings amounts through replacement of old boiler with highly efficient condensing boiler is up to 2,201,220 m3/year.
Total annual Gas savings amounts through Electricity (KW) generation by solar power project is 20,638,105 m3/year.

Emissions

Total annual Emissions savings amounts to 4770 Tons/Year by replacing inefficient boiler with highly condensing boiler.
Total annual Emissions savings amounts to 93.1 Tons/Year by installation of 250 KW solar project.
Total Emissions savings 4,863 Tons/year, 136333 trees are required to neutralize the impact.
Annual Carbon footprint are 20.0m CO2e.

Chemical Management & Sustainable Packaging

MRSL/RSL

0MRSL/RSL screening and Communication with our Suppliers, moving towards eliminating harmful Chemicals from our Supply Chain.
Joined DETOX Program Certification for multiple brands.
Monitoring to comply with ZDHC requirements to improve the environment community well being.
