

Zarafshon Tekstil

We are located in the center of Uzbekistan - in the city of Samarkand. Our location facilitates the effective solution of logistics issues related to the shipment of finished products and the supply of fabrics and accessories from other countries.

Our Service

Our company is a full-cycle textile production enterprise, from growing cotton fiber, producing our own fabric, technical development of patterns, to quality control and logistics of finished products.

Our Advantages:

1. Product Management Team

Our supply and product managers will help bring customers' ideas to life with optimal quality and cost.

2. Production Management Team effectively controls the entire product life cycle. The software provides employees with full visibility into planning and control.

3. Technical Development of Styles

Our team of patternmakers and technologists develop patterns and sewing technology according to the customer's technical specifications. Patterns are developed in the Gerber program to improve the efficiency of patternmakers and obtain more economical layouts.

700+
Styles per year

1200+
Samples per year

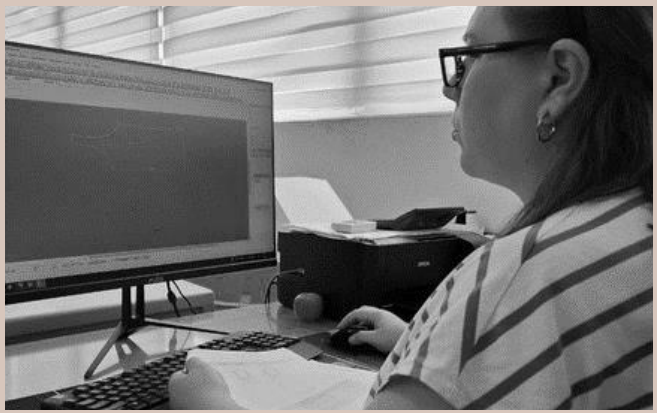

15+ employees at Sampling Department

13+
Technologists

4. Sampling Department

The development of prototypes and samples are produced by experienced seamstresses and cutters under the guidance of technologists, ensuring quality and compliance with requirements.

5.Quality Control Department (QCD)

The tasks of QCD are quality control at every stage of production, from checking the raw material to checking the finished product.

The dyeing wokshop laboratory tests each batch of fabric before sending it for cutting. Tests for: shrinkage, skewing, color fastness to dry and wet friction, fabric density and color variation. Controllers at sewing production check and sort each product and an inspection of finished goods is carried out according to the AQL 2.5 system before shipping to the client.

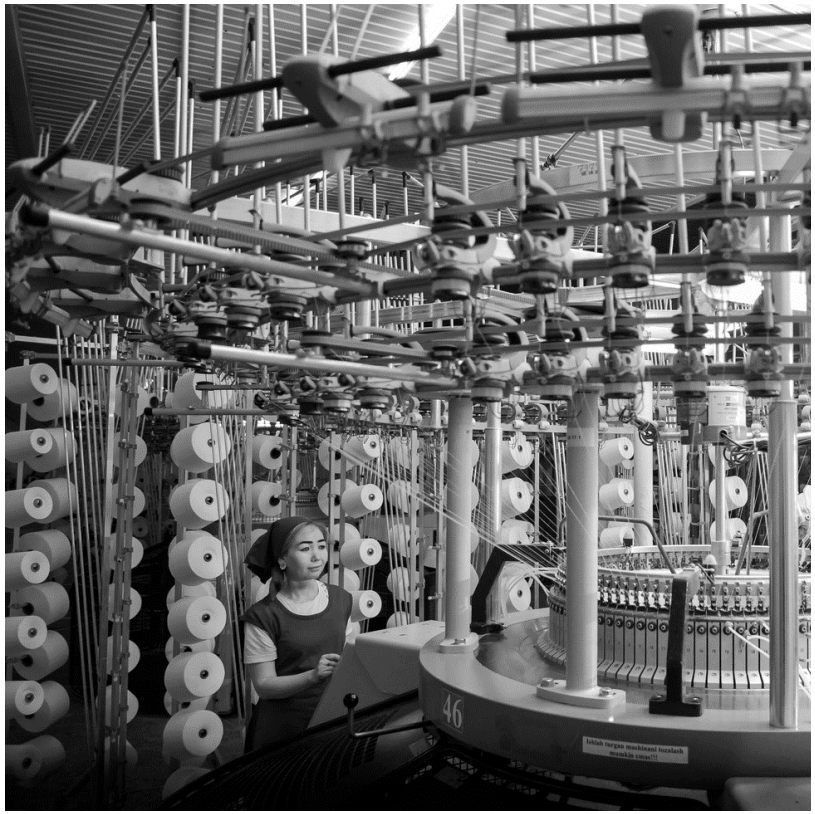

6. Production Planning and Control

Our own production planning and control system coordinates all functional parameters to ensure high-quality execution of all orders within the required timeframes. We manufacture products in our own factories.

Department	Equipment and Factory	Production Capacity Per Month
Knitting department	60 knittng machines	300 tons of raw fabrics
Dyeing department	10 dyeing machines	400 tons of dyed fabrics
Rotatory screen printing department	Up to 12 colors	125 tons of printed fabrics
Cutting department	6 Bullmer automatic cutting machines	2 mln units of cuts
Embroidery department	18 automatic machines with 12/15 heads	225 thsd units
Printing department	7 carousel machines	1,25 mln units
Sewing department	86 sewing lines	1,5 mln units of goods

Knitting Department

We knit raw fabrics (French terry, single jersey, pique, waffle, rib, interlock, fleece, jacquard), collars, cuffs and cords. Each of the 60 knitting machines we have produces about 300 kg of fabric per day.

Dyeing Department

We dye raw cotton, viscose and polyester fabrics. Daily productivity is 15-20 tons. Fabric types: solid, with brushing, with peach effect and striped.

Rotatory Screen Printing Department

We can print any design on fabric, using up to 12 colors in the work. We work in the technique of reagent, pigment, matfize and etching. Our technical designer can convey fine lines on fabric.

Cutting Department

Automated processes and the presence of experienced cutters allow for the optimal and rapid cutting of products in large volumes..

Printing Department

Our printing department works in the technique of silk-screen printing. We can do prints of various types: pigment, shimmer, glitter, caviar, etching, rubber, foil, stones, flock, puff and etc.

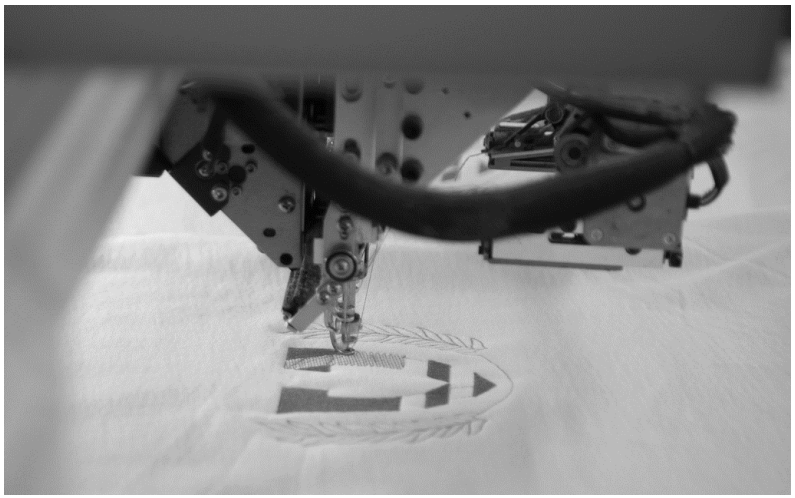

Embroidery Department

We make such types of embroidery as: tambour embroidery, 3D embroidery, appliques, chevron, sequins. We have equipment for stuffing pearls and rhinestones onto products.

Sewing Department

The total number of sewing lines is 86, 7 of which are intended for sewing models from the suit group (shirts, blouses, jackets, skirts). Our sewing department are located in 8 branches in Uzbekistan and are controlled by the central office.

Packing and Shipping

The packaging department packs each product into an individual package, distributes it into boxes, scans each item and sends the data to the customer's system. All boxes are sent to a single warehouse for further shipment.

Social Policy

We believe that only a socially responsible project is sustainable in the long term. Our social policy is an important part of our corporate culture. It reflects our values and work with all our partners.
