Design suite for Print, Weave and Knit

Designers work within a single application to design prints, create jacquard Knit and any kind of checks and stripes easily.

Clean Up & Repeat

Print module gives you the ability to scan artwork, fabrics, materials and photographs to quickly work in flat color and in repeat. This is the highlight of our software for most of our clients. In addition the designer can draw directly in repeat, in layers with color separations making a world of difference in your work flow and the creative output of your designs.

Jacquard Knit

Knit module allows any designers to draw on screen, on virtual graph paper, with square or rectangular grid at the right scale and in repeat in gauge. Then simulate your entire knit : a jacquard and structured stitches library comes with the software. Use them to simulate your knitted fabrics in a realistic way.

Weave Design

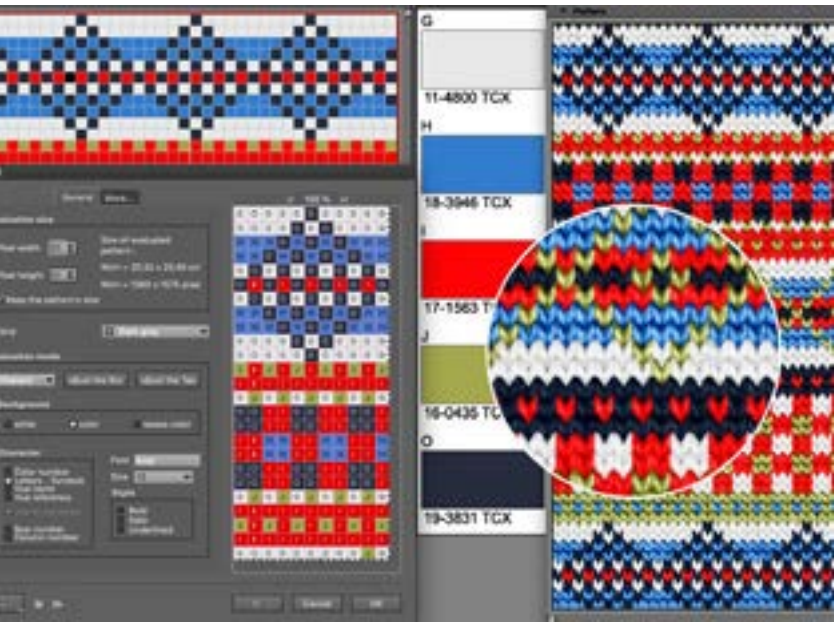

Weave module, takes the technical components of weaving and allows the designer to use them stylistically in a manner that is fun and easy to use and master. The 4000 + weave library that it comes with, makes visualizing a product with various constructions easy by dragging and dropping weaves from our library a truly magical experience! Our simulation feature allows clients to a real time view of the final product before it has even been woven.

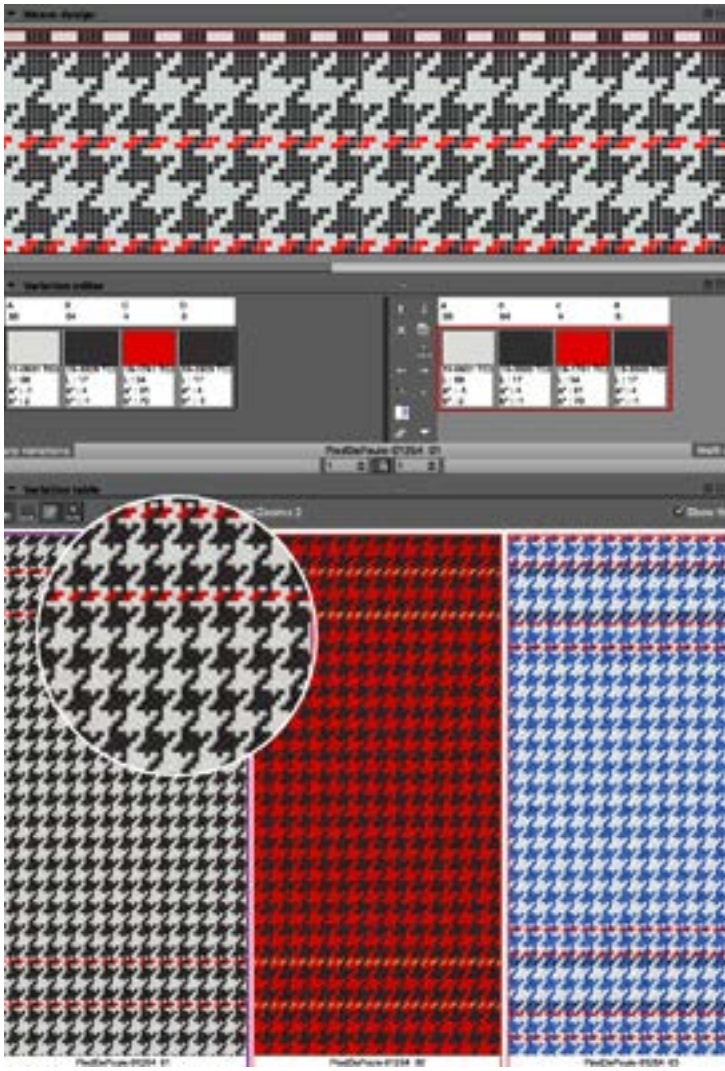

Color Collections

Pro Design is a fantastic package to create trendy color collections & palettes. User friendly, it will make your color search an easy process. The package embeds the entire Home Fashion Pantone® color Picker, and the complete CSI Colorwall™. Compatible with any color space!
